The ultrasonic wheel cleaning machine effectively cleans rims, tires, and alloy wheels using advanced ultrasonic technology to remove stubborn brake dust, grime, and dirt without scratching surfaces. It is efficient, environmentally friendly, and perfect for automotive workshops, detailing centers, and car enthusiasts, ensuring a spotless shine every time.

Model	JTS-1090AD
Tank dimension (mm)	900×560×900mm (L*W*H)
Tank total capacity	453.6L
Tank material	SUS304
Housing material	Stainless steel
Ultrasonic frequency	28kHz
Transducer quantity	90pcs
Electronic generator	3 units generators
Ultrasonic power	4500W
Heater's (hot plate) power	12KW
Heating temp	30~80°C adjustable
Timer control	0~30min adjustable
Tank's power requirement	AC 380V/415V,3Ø; 50/60Hz
Generator power requirement	AC 220V,1Ø;
Suitable tyre size	Diameter: 500-800mm Width:135-350mm
Maximum weight of wheel	50KG
Others	With pneumatic lift

OPERATION

Place the tire on the pneumatic chuck, and it will be delivered into the cleaning tank. At a temperature of approximately 40°C, the ultrasonic cavitation effect, combined with detergent, ensures excellent clarity for the tire and rim without any residue, pre-cleaning, or rinsing.

ADVANTAGES

- ✓

With digital control panel
High technology, easy to handle
- ✓

With motor rotation system
Tyre and rim can be rotated when ultrasonic cleaning
- ✓

With pneumatic chuck
It can hang on different size of car tyres
- ✓

With pneumatic lift
Tyre can automatically up and down in the tank
- ✓

With drainage
Easy for waste water flow away
- ✓

With casters
Easy to move
